

I have been a Amateur Radio Operator for over 40 years. During that time I have had to deal with interference to Medium Frequencies and High Frequencie from noisey power lines, electric fences, touch lamps, garage door openers. All of those problems were possible to overcome by working with the Utilitiy Companys and individual home or farm owners. Approving the use of BPL will cause MF or HF two way radio communications to become useless from the broadband interference that will be radiated from the power lines used for BPL. I am strongly opposed to this plan and feel that not only Amateur Radio will cease to exist, but all forms of Radio communications from all Agencies including Military and local Police and Fire Departments will suffer from the use of BPL.
